🪪 Profile

Approximately 4 years of experience in quality assurance engineering has been accumulated, complemented by ISTQB certification. Extensive testing has been performed on diverse applications using industry-standard tools and frameworks. Expertise includes creating robust test automation frameworks, conducting API testing, and executing End-to-End (E2E) testing. A strong focus has been placed on enhancing software quality and achieving continuous improvements. Proficiency in Agile practices and SDLC methodologies has been demonstrated, along with the ability to collaborate in team environments to deliver high-quality software solutions.

🎓 Education

Erciyes University, *Mechanical Engineering*   2004 – 2010 | Kayseri, Turkey

---

💼 Professional Experience

F4e, *QA Specialist* 🔗   Jan 2025 – Present | İstanbul, Turkey
- **Manual and automated test scenarios** have been created and executed for all modules, including **End-to-End (E2E)** testing, to ensure software quality and seamless performance.
- **API testing** has been conducted by verifying requests and responses of transmitted APIs, ensuring accuracy and compliance with requirements while utilizing appropriate tools.
- Visual inspections of newly developed user interfaces have been performed using Figma, both manually and with tools, to validate consistency with design specifications.
- Comprehensive quality standards have been **maintained** by **analyzing** and **resolving** defects, with continuous improvements integrated throughout all testing cycles.

AutomatedPros, *Quality Assurance Analsyt* 🔗   Mar 2024 – Jan 2025 | Dubai, UAE
- Actively involved in planning, developing, and implementing software quality assurance processes for https://orderific.com/ 🔗 .
- Taking on critical tasks in creating test scenarios, test automation, and defect tracking.
- Ensuring quality assurance throughout all stages of the project with the aim of continuous improvement and elevating quality standards.

Abone Sepeti, *Software Test Engineer* 🔗   Dec 2023 – Mar 2024 | İstanbul, Turkey
- Developing and evaluating system features and business requirements;
- Java-based automated user interface testing utilizing the **Junit, Cucumber, and Selenium WebDriver Frameworks**.
- **JIRA** and **JIRA XRay** were used as bug tracking software.
- Participated fully in each Scrum ceremony.

Talenttech Solutions, *Test Automation Engineer*   Dec 2022 – Dec 2023 | New York, USA
- **Automated, Developed and Executed** test cases and automation scripts. Automated UI testing using **Selenium WebDriver, Java and Cucumber Frameworks.**
- Performed and automated API Testing using **Rest Assured Library** and used **Postman** for **Manual API Testing.**
- Performed **End-To-End(E2E)** Testing.
- Participated in daily **Scrum, Sprint Planning, Sprint Review** and **Sprint Retro Meetings.**

E-Commerce Project & Letterbird – digital letters, *Software Test Engineer* 🔗   Dec 2021 – Dec 2022
- Performed UI automation testing using **Selenium Web Driver** and **Cucumber Framework.**
- Builded automation test framework by using **Appium** on created test cases.
- Formed **test scenarios** which are similar to end user's behavior.
- Shared all results , reports and suggestions with Stakeholders after test process.

🎖 Certificates

ISTQB Foundation Level Certificate – 07/2023 🔗 | My All Certificas 🔗

🧠 Skills

Java • Selenium • Cypress • Robot Framework • Playwright • Appium • JUnit, TestNG and Cucumber Framework •
SQL • API & API Testing • Git & GitHub • SDLC & STLC • Agile & Waterfall • Jenkins • JIRA - XRay / Test Rail •
JMeter • Postman • Strong communication • Problem Solving • Self-motivated • Team Player
